## **AEARU Advanced Materials Science Workshop**

### **“State of the art research in Materials Science”**

#### **Introduction**

The workshop will provide a platform for top-tier Asian universities including AEARU members to discuss the recent progress of materials science, and then result in strengthening an international collaboration by constructing the researchers' network and promoting international joint researches. We particularly would like to focus on the state of the art research topics in advanced smart materials & processing such as nanocomposites, ultralight & high-strength metals, biomaterials, 3D printing process and materials informatics by keynote speeches from distinguished researchers. In addition, through the workshop, there will be having a company tour for understanding the manufacturing and a city tour for cultural learning experiences in Osaka.

#### **Topics**

The fundamental and novel research topics regarding materials science- functional materials, structural materials, biomaterials and materials informatics, will be introduced and the discussions will be gone in each talk on state of the art research in materials science and engineering.

#### **Venue**

Convention Center, Osaka University

#### **Registration**

Those who would like to participate in the workshop are required to submit the completed form by email to [kokusai-koryu-suisin@office.osaka-u.ac.jp](mailto:kokusai-koryu-suisin@office.osaka-u.ac.jp) no later than Sunday, August 20.

#### **Financial Support**

Osaka University will provide accommodations for three nights, as well as meals and local transportation between the hotel and Osaka University during the workshop, for up to 2 students from each of the AEARU member universities.
